SUMMARY

Full-Stack Software Engineer with over 10 years of experience in software development and team leadership, expert in Java, PHP and NodeJS backend development, cloud integration and frontend development using a variety of frameworks including React, NextJS, VueJS all with TypeScript. I take pride in my proactive approach to tackle complex challenges as well as my work ethic, constant professional development and clear communication. My key achievements include leading the development of a scalable e-commerce system focused on speed and security. I have completed a stream of software projects from start to finish, designed and implemented complex cloud infrastructures and routinely came up with innovative fresh solutions that had huge impact on business success. Apart from being a seasoned developer, I am also very interested in all aspects of business from marketing, production, to gathering customer feedback and optimizing costs. To get better at my craft, I read plenty of books and take many courses through which I believe I can bring tremendous value to any team.

EXPERIENCE

Contract Senior Java Software Engineer

BBC

📅 05/2025 📍 Remote to London

Contractor in the Media Services Packaging and Access Team

- Britbox UHD VOD project to enable content delivered through Britbox in Ultra-High-Resolution
- Implemented custom IMF validation using Netflix's Photon library
- Implemented and deployed FMP4 HLS manifest creation affecting 43 live channels
- Set up a subtitle processing Lambda function to validate and fix broken subtitle files

Lead Developer

Fortium Technologies

📅 11/2023 - 03/2025 📍 Bridgend

Lead Developer at a technology company

- Managed a team of backend and frontend developers
- Significant contribution in securing a grant worth 250k for a new project by creating a proof of concept parts of the grant application
- Participated in strategy meetings with clients including Disney
- Established a way to serve full Linux Desktop in browser using Apache Guacamole and Spring Boot
- Planned, initiated and managed 2 new projects using NextJS and AWS SAM with Java 17
- Significant media industry and content security exposure
- Regularly created ad-hoc Python scripts for various automation tasks
- Coordinated and prioritized a project upgrade from Java 8 to 17

STRENGTHS

Java Software Development

Expertise in Java 21 and Spring framework, backed by Oracle and VMWare certifications.

Full-Stack JavaScript Development

Expertise in NextJS, NodeJS, Express.js with TypeScript

Frontend Web Development

Skilled in frontend development with multiple frameworks and tools such as React, NextJS, and VueJS all with TypeScript.

PHP Software Development

Proficient in PHP and Laravel 10+ with extensive experience.

Containerization and Virtualization

Significant insight into Docker container development and virtualization practices.

Databases

Expertise in planning, building, and optimizing relational and NoSQL database systems such as MySQL, Amazon Aurora, DynamoDB and MongoDB.

Mobile Application Development

Expertise in designing, developing, and optimizing cross-platform mobile applications using React Native and FastLane.

Adaptability and Learning Speed

Unique self-directed method of picking up and mastering new skills

Huge amount of books read

Hundreds of books read in marketing, business, leadership, communication and psychology

CAD Product Design

Notable expertise in using SolidWorks and other CAD software for product design and prototyping.

EXPERIENCE

Contract Full-Stack Software Engineer

SoCrowd

📅 02/2023 - 09/2023 📍 Birmingham

Contract Software Engineer focusing on app upgrades and team training

- Improved app user retention by 15% through upgrading features and resolving 30 critical bug issues
- Containerized the application by all 8 fragments work together seamlessly
- Planned and laid the foundation for a new project API and database structure using MySQL
- Conducted training for 2 new team members
- Contributed in a brand-new project start introducing React into the stack and promoting best practices in using Laravel 9 resulting 40% development efficiency boost
- Developed Java microservices using Spring Boot
- Introduced and promoted Test Driven Development practices

Senior Full-Stack Software Engineer

Media Exchange Group

📅 09/2021 - 02/2023 📍 Remote to London

Senior Software Engineer handling project leadership and CI/CD automation

- Was promoted to project lead within 5 months
- Established comprehensive CI/CD automation for 4 AWS environments
- Conducted interviews, hired, and mentored team members
- Led project through initial launch, onboarding BBC and Deutsche Welle
- Developed Java microservices using Spring Boot
- Implemented Starling Bank Webhooks implementation as well as found and corrected a bug in the SDK
- Used Laravel, NextJS and VueJS to build full-stack features

Senior Full-Stack Software Engineer

Worktribe

📅 03/2020 - 09/2021 📍 Bristol

Senior Software Engineer focusing on messaging application

- Contributed to real-time messaging application
- Implemented push notifications using Firebase in a React Native application
- Fixed 12 critical bugs in various versions of the core software
- Significant insight and exposure to the education and research sector

Senior Backend Developer

LOQBOX

📅 12/2018 - 03/2020 📍 Bristol

Senior Backend Developer working on financial services

- Improved team performance by 15% by mentoring 2 team members to enhance skills and productivity
- Implemented automatic card payments for half million active users in a live system
- Laid the foundation of the hugely successful automated payment processing services and the backend API using Laravel and a range of AWS services

EXPERIENCE

Senior Full-Stack Software Engineer

OpalTec

📅 10/2016 - 09/2018 📍 Bristol

Senior Full-Stack Software Engineer handling ecommerce and system design

- As a single developer, managed all 4 company websites for various parts of the business including CRM, E-Commerce and Online Booking systems
- Migrated old websites onto modern platforms such as Laravel
- Established highly successful a digital waiver signing system from start to finish including software development, hardware setup and remote management
- Designed and launched repair tracking system
- Built and launched a ski equipment e-commerce store
- Built an API to fetch tracking information from Microsoft Dynamics CRM using C#
- Built multiple Android applications using pure Java, which was the standard at the time

CAD Product Engineer

Internetscape Ltd

📅 10/2016 - 09/2018 📍 Bristol

CAD Product Engineer focused on product design and customer service

- Held responsibility in all aspects of the business from product design to sales, photography and after sale care as the sole person with creative and technical background within the business
- Increased product visibility by 30% through innovative chair designs and professional photography
- Managed all 300 products on 4 e-commerce websites in different languages
- Created over 100 detailed assembly instructions using SolidWorks
- Handled customer service in German

FREELANCE PROJECTS

Cloo

Cloo Entertainment

📅 2023 - 2024 📍 Bristol, United Kingdom

Outdoor team strategy mystery solving game

- Planned, designed and built the game builder engine
- Designed, planned and built the mobile application
- Built the deployment pipelines
- Built a high availability session manager microservice using **Spring Boot**
- Developed and deployed a **Kotlin Multiplatform** mobile application

ASDA/Lenstec order management portal

ASDA/Lenstec

📅 2020 📍 Remote

🔗 <https://lenstecportal.co.uk>

I was approached by Lenstec, the company managing ASDA Opticians for ASDA stores.

- I have built the entire internal order management system, which is in daily use till this day by over 300 ASDA stores nationwide
- Delivered the project in 3 months using Laravel and VueJS
- The portal has fully featured and well separated administrator and client facing interface
- The portal allows for messaging between users as well as posting articles and announcements besides ordering

KEY ACHIEVEMENTS

Scalable E-commerce System

Led the development of a new scalable e-commerce system focusing on speed, security, and full test coverage.

Grant Achievement

Contributed to securing a 250k grant for Fortium Technologies by proposing and demonstrating a project.

FREELANCE PROJECTS

Magyarshop

Magyarshop

📅 2023 📍 Bristol
🔗 <https://magyarshop.co.uk>

Magyarshop

- Built a fully featured online grocery store in just 3 months from scratch using Laravel and React
- The application has generated over £110k in revenue since it is in operation and is in daily use to this day

CERTIFICATIONS

Spring Certified Professional 2024 - 2V0-72.22

Completed the associated courses and earned the professional certificate with flying colours

Certified Cloud Developer Associate 2024 - DVA-C02

Completed the associated studies and passed the exam

Oracle Certified Professional, Java SE 11 Programmer 2023 - OCP 1Z0-819

Passed the exam with flying colours

PROJECTS

Shoptopus

📅 01/2021 - Present
🔗 <https://shoptopus.co.uk>

A comprehensive e-commerce platform using PHP and Java, Laravel and Spring Boot, React and NextJs

- Planned, designed architected and built 70% of the platform features
- Implemented complex features and API integrations such as payment processors and ChatGPT
- Built and configured the server environment with all its tooling and security from the ground up
- Used Laravel 10 to build the backend API and React for the Admin interface
- The product is integrated with the following services: self-hosted ELK stack, Stripe, ChatGPT, Social media platforms, AWS
- The project is fully Dockerized and features Jenkins CI automated pipelines
- No errors, no linter issues and 841 passing automated tests

SyncBin

📅 01/2023 - 01/2023
🔗 <https://syncbin.co.uk>

Tool for sharing text and images instantly across platforms

- Designed and developed a user-friendly sharing tool
- The tool allows real-time text and image sharing between multiple platforms regardless of geographical distance
- Text typed on one device appears near-real-time on the other or others sharing the same session
- Launched a web and mobile application

PixelGlyph Converter

📅 01/2024 - 01/2024
🔗 <https://apps.apple.com/hr/app/pixel-glyph-converter/id6476907161>

Mobile application converting photos into ASCII art

- Designed, developed and deployed the application on Apple App Store and Google Play in total of 8 days
- Built a SAM API based on Java 17
- The app is used by around 100 people Worldwide on a daily basis
